Aluminum Deck Balusters

Last-Deck, Inc, the leader in aluminum decking and aluminum railing systems. Last-Deck® understands that quality, variety and ease of installation are important not only to contractors but also to consumers. With our 9 Standard Colors and 7 WoodGrain Colours™, you can have an elegant, maintenance-free aluminum deck with all the look and the versatility of wood. It is important to get a deck that will look beautiful for years to come and the best way to get it is through aluminum decking.

With Last-Deck® aluminum decking and railing systems, you can customize your deck with your favoirte colors or wood grain styles, and enjoy the character of Last-Deck®'s finishes that are made possible through our custom powder coating. With our patented lifetime decking technology, it truly is the last deck you'll ever need. Explore our aluminum decking products and see how our Series 100 and 200 (water-tight decking) can add beauty and simplicity to your life.

Custom Powder Coating

Last-Deck® offers custom powder coating, custom sublimation, and custom fabrication to customers located across the United States and in Canada. Think of Last-Deck® 's Custom Powder Coating Division, Last-Coat™, as an extension of your company. Last-Coat™ will become your organization's powder coat department, meeting your needs and your deadlines. We have the capability of recieving your product, prepping, coating and packaging your finished powder coated product typically all within 48 hours. Last-Coat™ can offer you 1000's of custom power coat colors, textures and finishes; including, but not limited to, WoodGrain™, camouflage and marbled granite.

Installation Guides

Even with Last-Deck® aluminum decking's durable features, the design is so ingenious that almost anyone can install it. The self-spacing planking is always straight and true. The innovative design of the planking eliminates the use of a clipping system. Fastening and automatic precision spacing are built into the design. This design allows for consistent installation and also reduces installation labor up to 75%. A unique starter strip extrusion begins most installations, finishing with an edge trim extrusion designed to be highly functional as well as providing a handsome look. Check out the video link below to see how easily the Last-Deck® decking system is installed. Our installation manuals are also available below.
